PROBLEM STATEMENT

Slow diagnosis. Wrong fixes. High cost.

01

20–25 mins

minutes on average to find the root cause

Too many systems

The field team has to access too many systems to identify the root of the problem.

02

>90%

First Fix Right (FFR) today

Inaccurate solution

An inaccurate solution at the site affects our First Fix Right (FFR).

03

RM16 RM62

per ticket call est. per truck roll

Expensive cost, no return

Each ticket call is paid to the call center, on top of the truck roll cost per visit.

PROBLEM 01

Too many systems to access

~2 HOURS

saved per field team, every day

5–6 tickets × 20–25 min spent finding the root cause

All of it spent finding the root cause across too many systems

PROBLEM 02

Inaccurate solution

One KPI. Three teams.

KPI TARGET

First Fix Right (FFR)

Fixed correctly on the first visit.

Every first-time fix strengthens the trust between TM and the customer.

PROBLEM 03

Expensive cost, no return

EVERY TICKET CALL

RM16

estimated cost per ticket created by the call center

Salary (share)	RM8
+ Fees paid	RM2
+ Tools provided	RM6
= Total per ticket	RM16

EVERY TRUCK ROLL

Visit charge: RM53

Travel 40 km round trip × RM0.60/km (est.)	RM24
Time 0.5 h driving + 1 h on site (est.)	1.5 hrs
Salary 1.5 hrs × RM25/hr (est.)	RM38
Productivity 1.5 of 8 working hours not on tickets	~19%
= Travel + Salary (est.)	~RM62
